LONG TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

For the Technical Direction of the LTPP Program

Program Area:	General Operations	Directive Number:	GO-20
Date:	March 23, 1999	Supersedes:	DCG - Sec. 3.2

Subject: Revised Friction Measurement Requirements

LTPP has collected sufficient friction data for currently identified analyses. When future friction data requirements are identified for an analysis, appropriate guidelines, specifications and/or protocols for the needed data will be produced.

As a result, while LTPP will process any friction data provided by highway agencies, it is no longer requested for routine submittal. IMS uploads of ***MON_FRICTION*** will be reduced to every other year in odd years.

Questions concerning this directive should be addressed to the FHWA LTPP Operations Leader.
