LONG TERM PAVEMENT PERFORMANCE
PROGRAM DIRECTIVE

For the Technical Direction of the LTPP Program

Program Area: IMS **Directive Number**: I-68

Date: April 26, 1999 **Supersedes**: NA

Subject: Deletion of data from the ENV_* tables

This directive implements the guidelines for handling the data which became obsolete when the ENV_* tables were replaced by the CLM_* tables during August 1998.

Copies of the ENV_* module of the current climatic database will be archived by the TSSC. Format and media are left to the TSSC recognizing that the information may be transferred into the AIMS for long-term retention. Any ENV_* tables residing in the regional databases will be removed during the upgrade to the 2.4 version of the IMS.

Unless identified in the AIMS guidelines for long-term retention, the ENV_* archives will be retained for six months after the release of DataPave which contains the CLM_* tables. All supporting data for the ENV_* tables may be destroyed as of 1 January 2000.
