LONG TERM PAVEMENT PERFORMANCE
PROGRAM DIRECTIVE

For the Technical Direction of the LTPP Program

Program Area: Monitoring **Directive Number**: AWS-16

Date: December 7, 1999 **Supersedes**: AWS-13

Subject: Upgrade of AWSSCAN Software to Version 1.3

Attached for immediate implementation, please find Version 1.3 of the AWSSCAN software. This new version of the program contains modifications implemented to make the software Y2K compliant. More specifically, all date fields have been checked or modified to make the program Y2K compliant.

The above modifications require minor changes to the documentation; however, the Users Guide provided with the AWSSCAN v1.11 software will not be changed at this time.

AWSSCAN v1.3 supersedes previous versions of the program and should be installed on all computers being used by RCOC personnel to QC AWS data in the field. Installation consists of copying the file AWSSCAN.EXE off the distribution diskette and into an appropriate directory. This distribution disk also contains the original AWS.CFG configuration file. This file does not have to be copied if the RCOCs would rather use their current version of the file; however, AWSSCAN.EXE and AWS.CFG must be located in the same directory for the program to function properly.

If there are any problems, please submit an AWS problem report (AWSPR) form in accordance with the LTPP Monitoring Directive AWS-3.
