

LONG TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

For The Technical Direction Of The LTPP Program

Program Area: Traffic Monitoring **Directive Number: T-7**

Date: December 1, 1997 **Supersedes: N/A**

Subject: Upgrade of LTPP Metric Conversion Software to Version 2.0

This new version of the LTPP Metric Conversion Software contains modifications made in response to feedback from the RCOCs . More specifically, the following enhancements were made in this software version:

- < Modified software to resolve problem reported by Western RCOC staff (SPR W970009); both weight and spacing conversion factors have been corrected.
- < Modified software so that backlash, \, is always placed between subdirectory name and file name "shrp.dat" when selecting path of SHRP.DAT file.

Since both weight and spacing conversion factors have been corrected, all c- and w-card data processed with earlier versions of the metric software must be reprocessed by the RCOCs using this latest release. Reprocessing must be completed in time for the March 28, 1998 traffic data upload.

Please use the Software Performance Report (SPR) form to submit any problems identified with the software. Other questions concerning the software should be directed to Cindy Cornell-Martinez of the LTPP Technical Support Services Contractor (TSSC) Team at:

Chaparral Systems Corporation
