

LONG TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

For the Technical Direction of the LTPP Program

Program Area: Traffic Monitoring Directive Number: T-13
Date: May 29, 1998 Supersedes: N/A
Subject: Upgrade of Traffic Software to Version 5.78

This new version of the LTPP Traffic Software contains modifications made in response to feedback from the RCOCs. More specifically, the following enhancement was made in this software version:

- < Modified sheet entry program to allow for alphanumeric SHRPIDs.
- < Modified the Level 2-1 processor so that if the percentage of trucks in the GPS lane is 100% the AADT estimate is set to null.

The following steps transfer the Traffic Software from the distribution CD-ROM to your hard drive:

1. Copy \$STRAFF\$/SOURCE directory from the CD-ROM to your hard drive.
2. Edit OPTICAL file to correspond to your optical set up.

The LTPP Traffic Software User's Manual is still valid and should be used with this new version of the software. Please note that data reprocessing is required with this software release for sites with only truck records submitted.

Please use the Software Performance Report (SPR) form to submit any problems identified with the software. Other questions concerning the software should be directed to Cindy Cornell-Martinez of the LTPP Technical Support Services Contractor (TSSC) Team at:

Chaparral Systems Corporation
