LONG TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

For the Technical Direction of the LTPP Program

Program Area:	Traffic Monitoring	Directive Number:	T-16
Date:	April 19, 1999	Supersedes:	T-13
Subject:	Upgrade of Traffic Software to Version 5.79		

This new version of the LTPP Traffic Software contains modifications made in response to SPR 990002 from the Western Regional Office. The previous version of the traffic software was year 2000 (Y2K) compliant; however, in making it so, an error was introduced which prevented processing of the 1999 data. The following modification was made in this software version to fix that error:

<   Modified date objects in Level 4 Processor to allow for the year 1999.

The following steps must be followed to transfer the Traffic Software from the distribution cd-rom to your hard drive:

1.   Copy $TRAFF$/SOURCE directory from cd-rom to your hard drive.
2.   Edit OPTICAL file to correspond to your optical set up.

The LTPP Traffic Software User's Manual is still valid and should be used with this new version of the software. Please note that data reprocessing is not required with this software release; the Regional Offices can begin processing 1999 data.

Please use the Software Performance Report (SPR) form to submit any problems identified with the software. Other questions concerning the software should be directed to Cindy Cornell-Martinez of the LTPP Technical Support Services Contractor (TSSC) Team at:

Chaparral Systems Corporation
