

LONG-TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

For the Technical Direction of the LTPP Program

Program Area: Information Management System

Directive Number: IMS-11

Date: October 28, 1993

Subject: LTPP IMS Version 6.2

This directive is to provide version 6.2 of the LTPP IMS software. Attached are the software change notice, instructions, and the diskette for applying this upgrade.

The major change in this version is the new resilient modulus forms for entry (no editing) in US customary units with conversion to SI units and entry and edit in SI units. Data entry forms have been provided for all the protocols, worksheets, and summary forms and all the "old" forms have been removed. Some changes have been made to the COMMENTS table. All the general reports are resent and several changes have been made as described in software change notice No. 31. A SQL script has been provided that must be executed to remove the "null" records in INV_PCC_STEEL table.

This update is to be applied as soon as possible and the software change notice filed in the Operator's Log.

Approving Official
Paul Teng, Chief LTPP Division
