LONG TERM PAVEMENT PERFORMANCE
PROGRAM DIRECTIVE

For the Technical Direction of the LTPP Program

Program Area: **IMS** **Directive Number:** **I-78**

Date: **August 21, 2000** **Supersedes:** **I-77**

Subject: **Upgrade of the IMS to Version 2.8**

This directive implements the upgrade of the IMS from version 2.7 to version 2.8, incorporating changes issued in the interim to facilitate processing for the August upload.

IMS version 2.8, its installation instructions and associated change notice will be distributed by the Technical Support Service Contractor (TSSC). Processing details are included on the instruction sheet distributed with the software. The upgrade of the database software to version 2.8 and completion of the processing steps presented in this directive shall be completed by close of business September 1, 2000.

The flexible backcalculation tables are expected to be loaded in the September 8 upload with the exception of the duplicate records. The upload date for the corrected duplicate record data will most likely be in December. Additionally, there is no action to be taken yet with respect to data entry for new AC resilient modulus tables.

Technical questions associated with operational software issues for this upgrade should be directed to Rick Cale, 865-481-2198.
