LONG TERM PAVEMENT PERFORMANCE
PROGRAM DIRECTIVE

For The Technical Direction Of The LTPP Program

Program Area: Monitoring   **Directive Number: SM-26**

Date: November 17, 1997   **Supersedes: n/a**

Subject: Upgrade of ONSFIELD Software to Version 1.3

This new version of the ONSFIELD software contains modifications made in response to feedback from the RCOCs. More specifically, the following enhancements were made in this program version:

<   Modified program to allow users to view daily temperature display in two modes: one displays temperature data as contained in ONSITE data file and the other displays daily temperature data relative to acceptable temperature range specified in the ONSFIELD.CFG file (SMPPR W-14).
<   Modified program to allow users to view hourly battery voltage along with hourly temperature and rainfall data (SMPPR NA-18).

The above modifications do not require changes to the documentation; hence, the Users Guide provided with the ONSFIELD v1.2 software remains unchanged.

ONSFIELD v1.3 should be installed on all computers being used to collect SMP data. Installation consists of copying the files ONSFIELD.EXE and ONSFIELD.CFG off the distribution diskette and into an appropriate directory. The two files must be in the same directory for the program to run properly. The ONSFIELD v1.3 program supersedes previous versions of the program.

If there are any problems, please submit a SMP problem report (SMPPR) form in accordance with LTPP Monitoring Directive SM-6.
