LONG TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

For the Technical Direction of the LTPP Program

Program Area:	Monitoring	Directive Number:	SM-32
Date:	December 9, 1999	Supersedes:	SM-26
Subject:	Upgrade of ONSFIELD Software to Version 2.0		

Attached for immediate implementation please find Version 2.0 of the ONSFIELD software. This new version of the program contains modifications implemented to make the software Y2K compliant and to handle data collected with the OnsPlus program, which has been customized for the SMP Phase II monitoring. More specifically, the following modifications were made in this program version:

< All date fields have been checked or modified to make the program Y2K compliant.

< Scanning and plotting functions have been modified to handle data files collected with the OnsPlus program.

The above modifications require minor changes to the documentation; however, the Users Guide provided with the ONSFIELD v1.2 software will not be changed at this time.

ONSFIELD v2.0 should be installed on all computers being used to collect SMP data. Installation consists of copying the files ONSFIELD.EXE and ONSFIELD.CFG off the distribution diskette and into an appropriate directory. The two files must be in the same directory for the program to run properly. The ONSFIELD v2.0 program supersedes previous versions of the program.

If there are any problems, please submit a SMP problem report (SMPPR) form in accordance with LTPP Monitoring Directive SM-6.
